<https://github.com/tannpsy> | Portfolio

Final year Informatics student focusing on AI (ML, Deep Learning, CV, NLP, Data Science). Possess a strong passion for web development (React and Laravel). Currently developing my skills through academic projects, research experience, and internship experience. I believe that consistency can yield good results, and I'm eager to apply my skills to impactful projects.

EDUCATION

S.Kom, Informatics, President University

September 2023 - Present

- Current GPA: 3.94/4.00 (116 credits)
- 75% Jababeka Scholarship for Undergraduated Students, President University

WORKING EXPERIENCES

Internship, Data Science Intern, PT Bank Central Asia Tbk

August 2025 - February 2026 (Expected)

- Researched and integrated agentic AI platforms by developing a Model Context Protocol (MCP) using FastMCP, implementing standardized logging, and conducting large-scale stress testing to ensure system reliability and scalability
- Improved chatbot architecture and multimodal capabilities by applying the Builder Design Pattern and integrating Text-to-Speech (TTS) endpoints powered by Gemini models.
- Authored comprehensive technical documentation and executed structured user testing to validate system usability

PROJECTS

Crackterview – AI Powered Interview

KADA Capstone Project (2025)

[Github: <https://github.com/tannpsy/Crackterview.git>]

Developed an AI-powered interview platform using React for the frontend, Node.js with Express.js for the backend, and MongoDB for data storage. The core functionality relies on Gemini AI to provide intelligent, real-time interview analysis, assisting HR in candidate assessment and users in interview practice.

Merchandise Center

Academic Project (2025)

[Github: https://github.com/tannpsy/RIYAN_shop.git]

Developed a web application featuring AI-based summarization and sentiment analysis. Built using Vite React.js for the frontend and Flask for the backend, with Firebase handling data storage. A key part of the development involved collecting 2,000 data samples using WebHarvy to create the necessary datasets. For the AI models, BART-LARGE-CNN was utilized for summarization, and DistilBERT was employed for sentiment analysis.

Tomato Ripeness - Computer Vision

Academic Project (2025)

[Github: <https://github.com/tannpsy/tomatoripeness.git>]

Developed an AI-based tomato ripeness detection system utilizing YOLOv8m and YOLOv5m. Trained on the TomatOD dataset to accurately classify tomatoes into unripe, semi-ripe, and fully ripe categories with high mAP accuracy.

RIYA'S - Speech to Text Summarization

Academic Project (2025)

[Github: <https://github.com/tannpsy/riyasummarization.git>]

Collaborated to build a multilingual speech-to-text summarization system using mT5 and mBART models for transcription and summarization. Supports various languages and integrates a Flask-based web interface for real-time input and output processing. Developed as part of an academic project in natural language processing.

Pookies – Chatbot Mobile Application

Academic Project (2024)

[Github: <https://github.com/tannpsy/Pookies-app.git>]

Developed a mobile chatbot application in Java, integrating GPS and Bluetooth functionalities. The app utilizes SQLite for efficient local data storage and Firebase for its primary database. OpenAI powers the core AI capabilities, enabling intelligent conversational interactions within the application.

ORGANIZATIONAL EXPERIENCES

President University Major Association - Vice HRD

Oct 2024 - Nov 2025

- Responsible for managing and monitoring members as well as improving communication, teamwork, and decision-making. Effectively communicating student concerns, feedback, and initiatives to improve academic services and engagement.

SKILLS AND TOOLS

Language: Bahasa Indonesia (native), English (Limited Working Proficiency)

Technical Skills:

- **Programming Languages:** Java, Python, PHP, JavaScript
- **Artificial Intelligence:** Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Data Preprocessing and Visualization, Tensorflow, Pandas, Transformers, Keras, PyTorch, Agentic Platform, YOLO, OpenCV, Hugging Face
- **Web Development:** HTML/CSS, Tailwind CSS, Vite ReactJS, Bootstrap, Laravel, Streamlit
- **Database:** MySQL, Firebase, MongoDB, PostgreSQL
- **Tools & Platforms:** Android Studio, Google Colab, Microsoft Office (Intermediate), Git & Github, Postman, Docker, JMeter, VSCode, Canva, Jupyter Notebook, Figma

Soft Skills: Communication, Leadership, Problem Solving, Time Management, Teamwork, Continuous Learning, Responsibility, Adaptability

OTHERS

Certification:

- Korea - ASEAN Digital Academy Bootcamp by Elice Inc. (August 2025)
- Fundamental Data Science by Digital Talent Scholarship (July 2025)
- Introduction to Data Science by Cisco (May 2025)
